INTRODUCTION

This catalogue consists of two major sections: the List of Publications and the Periodicals Publishing Record.

(1) List of Publications

This section includes publicly available Alberta Government publications received in the Bibliography Section, Alberta Public Affairs Bureau during 1981. These are arranged alphabetically by corporate author. Legislative materials, such as Bills, Statutes and Regulations, are excluded from the list. Three indexes support the list: Personal Author Index, Subject Index, Title Index. Addresses of agencies issuing these publications precede the List of Publications.

(2) Periodicals Publishing Record

Public Alberta Government periodicals published in 1980 are listed alphabetically by key title. (Annual reports are excluded, but found in the List of Publications.) A Corporate Author Index and Subject Index provide access to these titles. Library locations holding these periodicals follow these indexes.

DATA BASES

This catalogue was printed from two *SPIRES* (Stanford Public Information REtrieval System) on-line data bases maintained in co-operation with the Information Systems Group of the Alberta Research Council.

(1) GAP

GAP (Government of Alberta Publications) includes bibliographic records and library locations of Alberta Government publications dating from 1905 to the present.

(2) PPR

PPR (Periodicals Publishing Record) contains data on currently published Government of Alberta periodicals and library locations holding these.

Both of these data bases are public *SPIRES* subfiles, available to anyone with a user account at the University of Alberta Computing Centre. Others may conduct searches through Information Systems at the Alberta Research Council and will be charged on a cost recovery basis.

PERIODICALS PUBLISHING RECORD 1980

Introduction:

The Periodicals Publishing Record provides detailed information about currently published Alberta Government public periodicals except for annual reports (which are recorded in the List of Publications). It is in three parts: (1) a title main entry; (2) a corporate author index, and (3) a subject index.

Data Elements:

The full bibliographical record is entered under the periodical's title; an explanation of the data elements follows.

Summary: A brief description of the periodical's area of concern.

Cost: Self-explanatory; most periodicals are free of charge. Prices given are for annual subscriptions.

Source: The organization to write to or to telephone for a subscription or for information about the periodical. All telephone numbers are within Area Code 403. Private citizens may telephone toll-free by dialing the R.I.T.E. (Regional Information Telephone Enquiry) number to be found in local directories under the heading Government of Alberta.

ISSN: The International Standard Serial Number supplied by the National Library of Canada.

Frequency: The number of issues intended to be produced each year. Frequency terms are derived from the *Canadian MARC Communication Format: Serials* developed by the National Library of Canada. The less obvious terms are explained as follows: Biweekly: every two weeks; Semimonthly: twice a month; Bimonthly: every two months. The use of terms such as "Twelve times per year" instead of "Monthly" indicates a periodical that is published twelve times per year at a frequency other than once a month.

Publishing History: The first line indicates the first issue of a title. The next lines in the Publishing History area record the periodical's actual output for the years indicated.

Locations: National Library of Canada codes indicate publicly-accessible libraries known to have at least limited holdings of the periodical. The publisher is always recorded as a location. (The location codes are explained after the indexes).

Notes: Additional explanations about the periodical (including changes of name) are provided here, when needed.

Subjects: The subject headings that relate to the periodical.
